

Condre Storage's SAS/ SATA Solution

MINNEAPOLIS – Condre Storage, Inc., a leading distributor and provider of high availability storage solutions, today announced the SASX12A, a SAS/SATA storage switch. Condre Storage is a technical integrator of raid and external storage solutions. Condre Storage has developed the SAS/SATA board for integration into their solutions for the digital video space, video surveillance, D2D market and users who need large amounts of storage with a very limited budget. The SASX12A can also be used with product from Condre Storage's direct raid partners as an expansion enclosure.

“Condre Storage has worked with manufacturers to solidify our lead as a technical distribution source. Our engineers have approved the SASX12A with LSI's SAS Megaraid card and ATTO's ExpressSAS raid card” according to Condre Storage President Denny Maetzold. “Condre is proud to be able to embed the SASX12A card into a solution, assemble with drives, test, support the items and still be a price leader in an effort to maximize our customer's mb/dollar cost”

About Condre Storage

Condre Storage Inc. is a distributor and integrator of computer hardware and software serving the VAR community with a specific product focus in data storage. Condre Storage has carefully chosen a combination of product lines in hard drives, tape backup, RAID systems, storage area networking (SAN), and software to provide resellers with a wide variety of storage solutions. Condre Storage's management, sales representatives, engineering staff, and support team, all have extensive backgrounds in the data storage market with more than 130 years combined.
